Space Development and Cooperation Among All Pacific Basin CountriesProceedings of the 9th International Space Conference of Pacific Basin Societies (ISCOPS, Formerly PISSTA) Held November 14-16, 2001, Pasadena, California, U.S.A.Amer Astronautical SocietyAdvanced Aerodynamic Measurement Technology

The demands for higher performance for modern aircraft have led the wind tunnel community, which is an integral link in the design process, to develop more refined and cost effective measuring techniques. These technologies have gradually matured from laboratory novelties into instruments regularly used in aerodynamic testing. The development of these modern measurement techniques has greatly extended the capability and accuracy of the classical methods for measurement techniques and provided better insight into flow physics. This Symposium provided a forum for active researchers to address the state-of-the-art, to exchange experiences and ideas, and for the practitioners to obtain an overview of the technology and learn how to apply it.
