

2 Press Papers

Online version: Technical papers portion of the SAE Digital Library references thousands of SAE Technical Papers covering the latest advances and research in all areas of mobility engineering including ground vehicle, aerospace, off-highway, and manufacturing technology. Sample coverage includes fuels and lubricants, emissions, electronics, brakes, restraint systems, noise, engines, materials, lighting, and more. Your SAE service includes detailed summaries, complete documents in PDF, plus document storage and maintenance

This enlightening book offers a collection of histories of underground papers from the Vietnam Era as written and told by key staff members of the time. Their stories, building on those presented in Part 1, represent a wide range of publications: countercultural, gay, lesbian, feminist, Puerto Rican, Native American, Black, socialist, Southern consciousness, prisoners' rights, New Age, rank-and-file, military, and more. Wachsberger notes that the underground press not only produced a few well-known papers but also was truly national and diverse in scope. His goal is to capture the essence of "the countercultural community." This book will be a fundamental resource for anyone seeking a deeper understanding of a dramatic era in U.S. history, as well as offering a younger readership a glimpse into a generation of idealists who rose up to challenge and improve government and society.

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

Chromatographic & Electrophoretic Techniques, Fourth Edition, Volume I: Paper and Thin Layer Chromatography presents the methods of paper and thin layer chromatography. This book discusses the practical approach in the application of paper and thin layer chromatography techniques in the biological sciences. Organized into 18 chapters, this edition begins with an overview of the clinical aspects related to the detection of those metabolic diseases that can result in serious illness presenting in infancy and early childhood. This text then discusses the three major types of screening for inherited metabolic disorders in which paper or thin-layer chromatography are being used, including screening the healthy newborn population, screening the sick hospitalized child, and screening mentally retarded patients. Other chapters consider the procedures for thin layer chromatography. This book discusses as well the complexity of amino acid mixtures present in natural products. The final chapter deals with the detection of synthetic basic drugs. This book is a valuable resource for chemists and toxicologists. The second volume of the history of Cambridge University Press covering the 1690s to 1872.
