

Accounting By Meigs And Meigs 8th Edition

Financial Accounting, 10e, by Meigs/Williams/Haka/Betner will gain support in traditional accounting departments where instructors expect students to not only understand the concepts of accounting, but to be able to apply and perform accounting processes. Truly a revision based on users needs and market feedback, the tenth edition of Financial Accounting offers increased end-of-chapter material, and a new student CD-ROM including GLAS, SPATS, and student tutorial. Chapters 6-10 are reorganized to be more consistent with the structure of a balance sheet, making the accounting process much clearer for the student. Finally, by providing a stronger foundation, Meigs better prepares students to apply concepts such as the Statement of Cash Flows and Financial Statement Analysis in later chapters. These changes and others have made an already proven financial accounting text even stronger.

Financial Accounting McGraw-Hill Companies

This new edition unites the text's long-running standard of excellence with a thorough revision reflecting contemporary concepts and issues in accounting. The managerial accounting section has been expanded, making this book appropriate for the 50/50 split accounting principles courses. The hallmarks of this text continue to be an exceptional balance between the preparer and user points of view, error-free text and supplements, and clear writing style. This is a reflection of the authors and their eminent dedication to
