Masculinities, Crime and Criminology presents an innovative and timely reading of issues which are central to the questions that have arisen in criminology: Why is crime so overwhelmingly an activity conducted by men? Is crime a 'masculine' phenomena? Richard Collier explores a number of high-profile events and debates around crime, criminal justice and social (dis)order, and examines recent criminological, media and political interpretations of the relationship between men, masculinities and crime. Following up on the success of the Adrenaline title Mob: Stories of Death and Betrayal from Organized Crime, Adrenaline Classics brings back the New York Times bestseller (originally published as Killer) that helped pave the way for the latest generation of nouveau-mob stories, from Donnie Brasco to The Sopranos. "Joey"—a journeyman Jewish hitman, numbers king, and loan shark—collaborated with David Fisher (co-editor of the hit Adrenaline title Wild Blue) to lay out the rackets in gripping detail. His story includes detailed accounts of his chillingly "professional" murders of thirty-eight victims. The strong sales of Mob are further evidence that the best mafia stories—and this is one of the best—capture the public's interest. Joey the Hitman's original best-seller status

reflects the quality of the writing, the frank intelligence of the subject/writer, and Joey's convincingly matter-of-fact, regular-guy tone. When he writes, debunking *The Godfather*, "... Actually very few mob members even have Bronx-Italian accents ... a lot of mob people are not very tough, the people we meet and deal with are very ordinary, most of us stay home at night and watch TV, and we only shoot each other when absolutely necessary," you know you're listening to the original Soprano. This edition includes a new afterword from David Fisher, who for the first time reveals Joey's identity and the incredible story of how Joey finally died.

"A highly readable and distinctly 21st-century boy's own tale." BEN SUMMERSKILL

We first meet Steve Church on a business trip in Bahrain where terrorists attempt to take over the hotel where he is staying. Using prior CIA training and tradecraft, Steve is able to blunt the attack until the police arrive. On the same day, the Director of the National Clandestine Service at the CIA calls to tell him that she wants to see him urgently. Steve, not knowing the nature of her interest, is conflicted. He is not wild about getting involved again with an overly bureaucratic CIA, and he knows that another CIA assignment would kill his relationship with his live-in girl friend Kella, a former French intelligence officer. Nevertheless, without being an adrenalin junky, he prefers the excitement of the CIA to working for West Gate, a defense contractor, where he is a fast tracker. Initially astonished and dejected that Steve will again risk his life to obtain information that policy makers will ignore, Kella is unable to change Steve's mind. Not willing to break off the relationship, Kella executes a mental somersault and recruits herself to go with Steve as his communicator. Meanwhile in Iran, the man who will become Steve's nemesis, Ali Mousavi, captures, interrogates and executes a scientist suspected of working for the CIA, the Great Satan's spy agency. He also orders a young American with uncertain loyalties, to Tehran from his home in California to work on a special project. Although Steve's father Marshall is now semi-retired from the CIA (does a spy ever retire?), he recruits an Iranian intelligence operative on a secret mission to the United States. Without a permanent presence in Iran, the CIA turns to Steve to handle the new agent (XYSENTINEL) in Tehran. Under business cover, Steve and Kella take over the case in Tehran. Their initial goal is to collect intelligence on Iran's nuclear plans and capabilities. Instead, they learn that Iran is preparing a massive cyber attack against the United States. Iran's theocracy, humiliated by the American Navy's control of the Persian Gulf, feels that anonymous cyber warfare is the card to play to force the Great Satan' to withdraw from the region. From the start, external factors begin to trump Steve's clandestine tradecraft. At stake is the future of the Middle East, the health of America's economy, and the lives of Steve and Kella. Today's headlines will take on an entirely new meaning after you read Satan's Spy.

The physical features of teenage kids change to catch up with their brain circuits ready to take on the pre-historic hunter-gatherer roles. The goal: resource mobilisation for survival. Resource mobilisation would not only help them survive but also to earn them invisible rewards by way of positive brain chemicals and electricity. However, the post-industrialisation scenario has been quite different. Teenagers get groomed via skill- or academic development to take on economic roles latest by their mid-twenties. Such grooming strategy does not always lead to the invisible rewards which they would have earned had they been playing their pre-historic hunter-gatherer roles. Most interestingly, today's versatile digital gadgets offer ample scope for earning brain rewards at the cost of sedentary lifestyles. The prevailing work-and-study-from-home culture has prompted the teenagers becoming dependent on digital technology and getting addicted to the gadgets for earning rewards. There is thus a new need for the parents of today's teenagers. They must smartly lead themselves and their kids so that digital technology is utilised for their healthy all-round development thus preventing any possibility of addiction. Divided into two parts, the Part 1 of this book throws light on the realities combined with tips; and, Part 2 introduces the new concept of Brain Tools for the use of the kids and the parents, based on the author's ongoing research on Neuro-management (NM).
