Covering an exhaustive range of information about the five boroughs, the first edition of The Encyclopedia of New York City was a success by every measure, earning worldwide acclaim and several awards for reference excellence, and selling out its first printing before it was officially published. But much has changed since the volume first appeared in 1995: the World Trade Center no longer dominates the skyline, a billionaire businessman has become an unlikely three-term mayor, and urban regeneration—Chelsea Piers, the High Line, DUMBO, Williamsburg, the South Bronx, the Lower East Side—has become commonplace. To reflect such innovation and

change, this definitive, one-volume resource on the city has been completely revised and expanded. The revised edition includes 800 new entries that help complete the story of New York: from Air Train to E-ZPass, from September 11 to public order. The new material includes broader coverage of subject areas previously underserved as well as new maps and illustrations. Virtually all existing entries—spanning architecture, politics, business, sports, the arts, and more—have been updated to reflect the impact of the past two decades. The more than 5,000 alphabetical entries and 700 illustrations of the second edition of *The Encyclopedia of New York City* convey the richness and diversity of its subject in great breadth and detail, and will continue to serve as an indispensable tool for everyone who has even a passing interest in the American metropolis.

Photography delivers the fascinating story of how photography as an art form came into being, and its continued development, maturity, and transformation. Covering the major events, practitioners, works, and social effects of photographic practice, Robert Hirsch provides a concise and discerning chronological account of Western photography. This fundamental starting place shows the diversity of makers, inventors, issues, and applications, exploring the artistic, critical, and social aspects of the creative process. The third edition includes up-to-date information about contemporary photographers like Cindy Sherman and Yang Yongliang, and comprehensive coverage of the digital revolution, including the rise of mobile photography, the citizen as journalist, and the role of social media. Highly illustrated with full-color images and contributions from hundreds of artists around the world, *Seizing the Light* serves as a gateway to the history of photography. Written in an accessible style, it is perfect for students newly engaging with the practice of photography and for experienced photographers wanting to contextualize their own work.

CHI edition of German Lesson. During the Nazi occupation of Germany, a 10-year old boy's father was duty-bound to remove the forbidden art by Nansen, but the boy thought he had the duty to preserve them. The undercurrent and the dynamics make this book a classic. In CHI. Distributed by Tsai Fong Books, Inc.

"The first part of the book is concerned with differing theoretical approaches to visual analysis, and includes chapters on iconology, form, art history, ideology, semiotics and hermeneutics. The second part shifts from a theoretical to a medium-based approach and comprises chapters on fine art, photography, film, television and new media. These investigate the complex relationship between reality and visual representation." -- Book Jacket.

There is little dispute that photography is a material practice, and that the photograph itself is ineluctably material. And yet “matter,” “material,” and “materiality” have proven to be remarkably elusive terms of inquiry, frequently producing studies that are disparate in scope, sharing seemingly little common ground. Although the wide methodological range of materialist study can be dizzying, it is this book’s contention that that multiplicity is also the field’s greatest asset, keeping materialist inquiry enduringly vibrant—provided that varying methods are in close enough proximity to converse. *Photography’s Materialities* orchestrates one such conversation. Juxtaposing the insights of theorists like Lacan, Benjamin, and Latour beside close studies of crime, spirit, and composite photography, among others, this collection aims for a productive synergy, one capacious enough to span transatlantic spaces over the long nineteenth century. Contributors: Kris Belden-Adams (University of Mississippi), Maura Coughlin (Bryant University), David LaRocca (independent scholar), Jacob W. Lewis (University of Rochester), Mary Marchand (Goucher College), Zachary Tavlin (Art Institute of Chicago), Christa Holm Vogelius (University of Copenhagen)

Explores the fundamentals of photography *A Short Course in Photography: Film and Darkroom*, 9/e introduces students to the fundamentals of photography and suggests ways in which they might create photographs that have meaning. With a special focus on black and white photography, the book also explores digital techniques and web photography resources, equipment, cameras and camera accessories, the exposure and development of film, and the making and finishing of prints. All aspects of the process are explained and clearly illustrated for students to access. Every pair of pages covers a complete topic along with the accompanying illustrations, diagrams, and photos.
