Volume 15 in The Middle Works of John Dewey, 1899-1924, series brings together Dewey's writings for the period 1923-1924. A Modern Language Association Committee on Scholarly Editions textual edition. Volume 15 completes the republication of Dewey's extensive writings for the 25-year period included in the Middle Works series. Many facets of Dewey's interests—politics, philosophy, education, and social concerns—are illuminated by the 40 items from 1923 and 1924. Inspired by his own convictions and those of his friend Salmon O. Levinson, founder of the American Committee for the Outlawry of War, Dewey's articles became the keystone of the committee's campaign to outlaw war. His essay, "Logical Method and Law," is perhaps the most enduring of Dewey's writings in this volume. Dewey's philosophical discussions with Daniel Sommer Robinson, David Wight Prall, Arthur Oncken Lovejoy, and Sterling Power Lamprecht are represented here, as is Dewey's assessment of the Turkish educational system.

Desires lead to actions, influence feelings, and determine what counts as a reward. Recent empirical evidence shows that these three aspects of desire stem from a common biological origin. The author reveals this common foundation and builds a striking new philosophical theory of desire that puts desire's neglected face-reward-at its core.

A comprehensive and authoritative account of one of the greatest and most prolific writers of classical antiquity.

At the start of World War, II the U.S. Army turned to Americans of Japanese ancestry to provide vital intelligence against Japanese forces in the Pacific. *Nisei Linguists: Japanese Americans in the Military Intelligence Service during World War II* tells the story of these soldiers, how the Military Intelligence Service (MIS) recruited and trained them, and how they served in every battle and campaign in the war against Japan. Months before Pearl Harbor, the Western Defense Command (WDC) selected sixty Nisei soldiers for Japanese-language training. When the WDC forcibly removed more than 100,000 persons of Japanese ancestry from the West Coast, MIS continued to recruit Nisei from the relocation camps and later from Hawaii. Over the next four years, the school graduated nearly 6,000 military linguists, including dozens of Nisei women and hundreds of Caucasians. *Nisei Linguists* tells the remarkable story of those who served with Army and Marine units from Guadalcanal to the Philippines, Iwo Jima, and Okinawa. Their duties included translation, interrogation, radio monitoring, and psychological warfare. They staffed theater-level intelligence centers such as the Allied Translator and Interpreter Section in the Southwest Pacific Area. In China, Burma, and India they served with the Office of Strategic Services, Merrill's Marauders, and Commonwealth forces. Others served with the Army Air Forces or within the continental United States. At war's end, the Nisei facilitated local surrenders of Japanese forces as well as the occupation. Working in military government, war crimes trials, censorship, and counterintelligence, the MIS Nisei contributed to the occupation's ultimate success.

Working With Words; Words to Work With was conceived as the author was preparing a presentation on motivation. As handout materials were being prepared, the author wrote copy for several motivational words. He filled both sides of a 5 ½" x 8 ½" sheet with copy. Looking at several sheets as they were lying together, he thought an assembly of many sheets would make an interesting book. The reader can pick up the book, and read two pages, or as many as he or she wishes. Each two page article will be complete in itself, There are many occasions when a reader has only a few minutes to relax through reading; for example, on the subway, in the bathroom, or at lunch. The words chosen for this book are work-related, and in most cases they are inspirational words.

Readers today no longer relish sustained allegorical narratives the way they did in the Middle Ages, when the art of 'other-speaking' was as dominant in poetic discourse as it was elsewhere. Yet we live in an age which, following the postmodernist dictum that any sign can only refer to other signs, has declared all language liable to the 'allegorical condition'. This paradox has led the author to question the epistemological assumptions underlying allegories composed in an era which, conversely, favoured the oblique form of expression while professing its belief in the divine Logos as the ultimate ground of all meaning. If art and doctrine appear so divided on the subject of allegory in our own day, then might not the relationship between allegorical writing and interpretation in the Middle Ages have been more complex than is often assumed? How solid are the grounds on which Michel Foucault has based his distinction between early modernity and its past - a time when, he claims, the languages of the world were still perceived to make up "the image of the truth"? The present study addresses these and related questions through a heuristic comparison between historically and culturally different approaches to narrative allegory. In her analysis of the late-fourteenth century dream poem Piers Plowman by William Langland, Kasten sets up a critical dialogue between this extraordinary work and Walter Benjamin's study of German baroque allegory, The Origin of German Tragic Drama. Far from serving the narrow purposes of didacticism, she contends, Piers Plowman invites a reconsideration of the very grounds on which (post-) modernity has tried to distance itself from its cultural past.

This Book was written because in today's world most people turn to the wrong advisors. They go to a psychic or fortune teller. If they would follow their learned religion, as they had grown up with, they would not need to go anywhere else but read the Bible, look to the heavens for answers, because that is where the true help is coming from, but they also need to believe in God, for he is the only one who really can help no matter what. As he has proven to me over and over again throughout my whole life. Monika Grunwald -Schutz.

The author has been a psychiatrist for thirty-nine years and has worked with thousands of patients. His impression is that many of their problems have to do with the way they process or deal with information. Often, maladaptive pathways of thinking are employed to the person's detriment. When this occurs, it tends to be repeated again and again and becomes habitual. Eventually, symptoms such as anxiety, depression, suicidal feelings and addiction are generated and become more and more problematic. In the author's experience, this can be interrupted by mentally training oneself to only travel down adaptive pathways of thinking. With this approach, old pathways of thinking are abandoned. There are a number of techniques that can be employed to establish and reinforce newer adaptive pathways of thinking. It's not for everybody and should not be used exclusively, but first and foremost among techniques is mindfulness. The author has seen it work again and again. Introduced to the world by Buddha for the purpose of enlightenment, nowadays it is used for mental health issues. The mindfulness here is different from the type taught in DBT. The author is not saying that DBT mindfulness doesn't work; it's just that he has seen better outcomes with the type he teaches. He learned the basics of it at IMS at Barre, Massachusetts, during various meditation retreats. Modern psychology does not address the invisible spiritual worlds that interface with the physical world. According to religious teachings, these worlds really exist and forces from them can influence our thinking. Reportedly, an archangel rebelled against God and was booted out of heaven. A third of the angels went down with him to earth. They seek to have us act in such a way so that when we die, they can claim our souls and torture us in hell. The present work at least addresses this issue. Likewise, energy medicine is discussed briefly.

The book makes the case that Lee Harvey Oswald did not kill the president. Rather, an elaborate plot, concocted and executed by a sinister, covert cabal, took Kennedy's life. The plotters who stood to gain the most from JFK's death – Lyndon Johnson and Allen Dulles – were abetted by powerful interests in government, business, and the military. Kennedy was moving America toward a permanent peace state, threatening the national security/military establishment whose existence is dependent on a permanent war state. Since 1963, we have been at war or under a threat of war, spending nearly six of every ten tax dollars on defense. It is vital to expose the truth of who killed Kennedy and why, if we are to understand the real history of America since 1963. Fleming draws a straight line from Dallas to the political and cultural divide that afflicts us today.

The fact is that life truly is motivation. You have a choice to get up in the morning as you do to stay within the comfort of your bed. We as individuals must understand that the choices we make today, dictate the future. We can never go back in a moment because nothing lasts forever. This is why it is our job to control our mentality, promoting a positive, unstoppable mindset. Always remember, that at the end of the day even after you believe you have given it everything you have, you can always get more from your body. It's evident that we are unable to control external factors within our lives but what we can control are the internal factors such as our attitude and perception on any given situation. It is our job in this lifetime to face our fears and let nothing stop us from achieving anything we desire. Live your life with a plan of action, fear nothing and this world is yours for the taking. If all doesn't work out switch your strategy and come back full force.

None of us expects to become a crime victim. We like to think this is something that happens to someone else. Yet, crime victimization is a traumatic and frightening experience that touches millions of innocent Americans each year. Most of us would have no idea what to do if we, or someone we love, became the victim of violent crime. Until the 1970s, there were almost no services available to help crime victims and their survivors cope with the ordeal, or get them through the frustrating, often incomprehensible workings of the court system.. Fortunately, there now are many resources for victims to help them emotionally, legally, and even financially but finding them is another matter. How to Survive in the City has compiled lists of hotlines and resources for every sort of emergency you are likely to encounter, including national victims hotlines, national business and fraud resources, and domestic abuse, rape, and stalking hotlines. The author has also put together a wealth of information from law enforcement agencies on how to outwit the criminal and avoid becoming his victim. She describes how to keep watch for child molesters in your neighborhood, and how to make sure your child does not become one of his victims. She talks about rape, how to avoid it, and what to do if it happens. She discusses domestic abuse, elder abuse and child abuse and what to do if you or a loved one is in such a situation. She tells you how to make your home safe, and how to use common sense precautions to keep from being burglarized or robbed in the street. She describes the pitfalls you can fall into with credit card and identity theft, she details the latest frauds and scams and tells you how to avoid falling victim to the con artist. Life in today's big cities can be joyous and exciting, as long as we know how to negotiate the minefields. How to Survive in the City is a wealth of information on how to beat the criminal at his own game and avoid becoming a crime victim.

Suitable for the scholarly study of Dewey's philosophy, this title enables the reader to appreciate the force of Dewey's thought in contending philosophical ideas of his time. This is a book about change, not only what change is, but also how change affects us, our responses to change, and finally, a biblical model for overcoming change. You may ask, "Why a book about change?" The reason is that we live in a world of change. Change occurs in our lives on a daily basis. Change is the only thing that is constant. Look around you. Change is everywhere and occurs interpersonally, relationally, constantly (organizations either getting smaller or larger), technologically (increases are at an astronomical rate). Even the focus of the church changes as culture changes (sacred old hymns to contemporary music, and single pastor to multi-ministerial staffs), and on it goes. Change definitely is constant, and change is everywhere. "Robin Brumfield takes us by the hand with a Bible in the other hand, and walks along some Bible trails where change took place and helps us to see a reflection of our own existence in some of these experiences." --Jim Futral Executive Director - Treasurer Provides a training schedule, exercises, nutritional guidelines, equipment suggestions, and tips on technique for safe and healthy cycling for the middle-aged
