This book presents an East-West dialogue of leading translation scholars responding to and developing Martha Cheung's "pushing-hands" method of translation studies. Pushing-hands was an idea Martha began exploring in the last four years of her life, and only had time to publish at article length in 2012. The concept of pushing-hands suggests a promising line of inquiry into the problem of conflict in translation. Pushing-hands opens a new vista for translation scholars to understand and explain how to develop an awareness of non-confrontational, alternative ways to handle translation problems or problems related to translation activities that are likely to give rise to tension and conflict. The book is a timely contribution to celebrate Martha's work and also to move the conversation forward. Despite being somewhat tentative and experimental, it probes into how to enable and develop dynamic interaction between and reciprocal determinism of different hands involved in the process of translation.

Spoken by nearly 70 million people not only within the Korean Peninsula but also in five continents, Korean is one of a dozen major languages of the world. Yet outside Korea it is not as much studied as it should be, nor has it acquired commensurate international recognition. With its difficult sound system, rich word formation patterns, and complex sentence structures, Korean is one of the most challenging to learn as a foreign language, yet there is little that is written in English about Korean. This book eminently fills this gap. The author presents Korean in a lucid and readable manner covering topics from scripts to sounds, from words to sentences, and from discourse to text analysis. It is therefore both comprehensive and concise. It avoids unnecessary details but includes all essential subjects, and describes them in a well-organized theory-free prose. This book should be a handy reference for both teachers and students of Korean, especially those abroad.
