The varying presentations of the rules for nicht and kein found in intermediate grammar books for students in North America and DaF-learners in Germany highlight the difficulty in finding sources that are both reliable and consistent as well as easily applicable. This thesis seeks to compare the explanations found in A.E. Hammer's German Grammar and Usage (revised by Martin Durrell), Helbig/Buscha's Deutsche Grammatik, and Hall/Scheiner's Übungsgrammatik, comparing all three to the basis of their information, Duden: die Grammatik. In order to assess how and where these sources converge and diverge, the analysis compares the intended use of each book, followed by the underlying concepts and terms, and then finally the rules for negation. The final two chapters attempt to answer two important questions that arise from comparing these sources. First, do beginner level textbooks prepare students with sufficient declarative grammar knowledge to understand and apply negation rules successfully? An

analysis of Kontakte's approach to teaching grammar, most specifically how to use nicht and kein, seeks to answer the first question. Secondly, could authors use a different approach for explaining this difficult grammar topic? Professor Hardarik Blühdorn's approach, as presented in his course Negation: Syntax, Prosodie und Semantik at the Universität Mannheim during the Fall semester of 2007, serves as an example of new research. His different approach might help non-native speakers of German learn how to use nicht and kein correctly. The analysis reaches three main conclusions. First of all, the rules differ primarily in the amount of detail used, as well as in the inconsistent use of common terminology across the sources. Secondly, beginner's level textbooks do not provide students with sufficient information about general grammar or negation to help them transition to using explanations found in intermediate grammar books. In order to understand the rules of nicht and kein, these students must first work through the background material methodically. Finally, intermediate learners could not rely on Professor Blühdorn's approach, as it focuses on the scope of nicht, not on the correct placement of nicht in order to negate an entire sentence. Appendix B provides a chart comparing the rules found in each source.

The German Language Today presents the linguistic variety of the German speaking community as well as describing the main systematic features of the language. The

volume covers most of the factors which produce competing forms in German as well as describing the sounds, inflectional processes, syntactic structures and different layers of words in the language. Using illustrative texts and examples, Charles Russ combines the recognition of the great breadth of variety throughout the German speech community with an introduction to the use of basic linguistic terms and the description of language structures. In addition, he also gives recognition to the fact that languages are constantly changing, always accumulating new words and meanings. The book provides the first analysis of the implications of German unification upon the German language and its speaking community--East and West alike--proving to be important reading for linguists and German speakers.

This book is the Chinese translation of "Der, Die, Das: The Secrets of German Gender." The challenge that Chinese speakers face if they want to speak German well, is to accurately map German nouns to one of three grammatical genders: masculine, feminine or neuter. Native German speakers acquire their knowledge of the grammatical gender of German nouns from early on. They are not given formal instruction at school about matching nouns to their correct gender, and the topic is not covered in standard German grammar books. For the same reason, native speakers who give German language lessons to foreigners do not teach their students how to match nouns to their gender: One cannot teach what one has not been taught. This book fills that gap in that it explains, in Chinese, the principles that map German nouns to a specific gender. This allows foreign students of German to unlock the gender of entire

categories of nouns, thereby enabling students to speak German more confidently.
