

Healthy Land Happy Families And Profitable Businesses Essays To Improve Your Land Your Life And Your Bottom Line

In the mid-nineteenth-century United States, as it became increasingly difficult to distinguish between bodies understood as black, white, or Indian; able-bodied or disabled; and male or female, intense efforts emerged to define these identities as biologically distinct and scientifically verifiable in a literally marked body. Combining literary analysis, legal history, and visual culture, Ellen Samuels traces the evolution of the “fantasy of identification”—the powerful belief that embodied social identities are fixed, verifiable, and visible through modern science. From birthmarks and fingerprints to blood quantum and DNA, she examines how this fantasy has circulated between cultural representations, law, science, and policy to become one of the most powerfully institutionalized ideologies of modern society. Yet, as Samuels demonstrates, in every case, the fantasy distorts its claimed scientific basis, substituting subjective language for claimed objective fact. From its early emergence in discourses about disability fakery and fugitive slaves in the nineteenth century to its most recent

manifestation in the question of sex testing at the 2012 Olympic Games, *Fantasies of Identification* explores the roots of modern understandings of bodily identity.

The first fully-fledged ethnography on health-related issues to come out of contemporary Vietnam, *Women's Bodies, Women's Worries* is a study of women's lives in a rural commune in Vietnam's Red River delta. Starting as an examination of the impact of Vietnam's ambitious family planning policy on the health and lives of rural women, the study explores historical and contemporary socio-cultural forces which influence the lives of Vietnamese women. What begins as an investigation of contraceptive side effects becomes an inquiry into the daily lives of rural women, an examination of the moral ideologies by which women's lives are circumscribed, and an exploration of the ways women themselves manage and negotiate the moral demands and social relations which constitute daily lives. In addition, the book provides a sympathetic account of the everyday lives and concerns of rural women while also including theoretical considerations of the social grounding of bodily experience, the cultural meanings of health and illness, and the everyday politics of emotional expression.

This is a tale of a life few understand today: the human cost of Empire, where families were torn apart - a father seen once every four years - growing up in the

Thirties, a time much talked and written about by those who never knew it; a strange Oxford; the war at its most savage against an enemy like no other. And then communicating to a generation that knew not these things the values we had fought for. It is the story of one who found a faith and who after a life longer than most believed others should know about it. Over these years the East followed the author until he said goodbye to it in a special way. A tale of struggle, but of much fun and a humour that lights up its pages . You will discover after reading this book that these years have been worth recalling.

Rising energy prices and concerns about climate change are driving us towards a new kind of economy - a low-carbon economy. What will this low-carbon economy be like, and what does your business have to do to prosper in this new business environment? Larry Reynolds shows how successful organisations are already learning to be more energy efficient, manage their carbon footprint, adapt to climate change and become truly sustainable. As well as explaining how to future-proof your organisation against possible threats, *The Business Leader's Guide to the Low-carbon Economy*, tells you how to make the most of the many opportunities that the low-carbon economy will bring, especially in growing profits from new products and services. It is your guide to creating an organisation that will thrive in the twenty-first century. While there are plenty of published books about 'going green', there are none which explain the low-carbon

economy and how to thrive in it. This book will fill that important gap. Drawing on examples from across industries, including businesses such as Asda, BT, Cargill, Coca Cola, Co-operative Group, Eurostar, Marks and Spencer, Tesco, Tesla, Walker's Crisps, Walmart and ZipCar, Larry Reynolds shows how today's successful organisations are already benefiting from the coming low-carbon economy.

Through The Ranching For Profit School, Dave Pratt has helped thousands of families on millions of acres improve their land, their lives and the profitability of their ranches. In Healthy Land, Happy Families and Profitable Businesses, Dave shares insights and experiences from the school and his clients that can improve the health of your land, the happiness of your family and the profitability of your business. "A master storyteller, Dave Pratt explains, applies, and sticks the reader with the most profound insights you'll find in any farming business book. To have this much uncommon good sense packed into such a readable format is unprecedented. Because it condenses decades of experience into one volume, this book delivers more meaningful advice in a small space than I've ever seen. I'd want this one on my shelf even if I didn't have any others. What a delightful, wisdom-dense read." - Joel Salatin, Poly Face Farm

This book examines gender in post-revolutionary Vietnam, focusing on gender relations in the family and state since the onset of economic reform in 1986. Drawing on a wide range of primary sources (including surveys, interviews, and responses to film screenings), Jayne Werner demonstrates that despite the formal institution of public

gender equality in Vietnam, in practice women do not hold a great deal of power, continuing to defer to men in both the family and the wider community. Contrary to conventional analyses equating liberalisation and decentralisation with a reduced role for the state over social relations, this book argues that gender relations continued to bear the imprint of state gender policies and discourses in the post-socialist state. While the household remained a highly statist sphere, the book also shows that the unequal status of men and women in the family was based on kinship ties that provided the underlying structure of the family and (contrary to resource theory) depended less on their economic contribution than on family norms and conceptions of proper gendered behaviour. Werner's analysis explores the ways in which the Doi Moi state utilised constructions of gender to advance its own interests, just as the communist revolutionary regime had earlier used gender as a key strategic component of post-colonial government. Thus this book makes an important and original contribution to the study of gender in post-socialist countries.

Written by a leading authority on the history and practice of Chinese astrology, this comprehensive new entry in the continuing Bible series brings together all the basics on this ancient form of divination. Filled with color photographs and beautiful illustrations, it covers everything from the 12 animals of the zodiac to calculating your sign to creating a detailed analysis of your chart based on the exact time of your birth. There's also advice on developing your horoscope further, as well as using Chinese astrology in

conjunction with Eastern medicine and feng shui.

If you watch horses grazing pasture, you would think that they were made for each other. You would in fact be correct; millions of years of evolution have created a symbiotic relationship between equines (and other grazing animals) and grasslands. Our aim as horse owners and as custodians of the land should be to replicate that relationship on our land as closely as possible. In an ideal world, most horse owners would like to have healthy nutritious pastures on which to graze their horses all year round. Unfortunately, the reality for many horse owners is far from ideal. However, armed with a little knowledge it is usually possible to make a few simple changes in your management system to create an environment which produces healthy, horse friendly pasture, which in turn leads to healthy 'happy' horses. Correct management of manure, water and vegetation on a horse property is also essential to the well-being of your family, your animals, your property and the wider environment. This book will help to convince you that good land management is worthwhile on many levels and yields many rewards. You will learn how to manage your land in a way that will save you time and money, keep your horses healthy and content and be good for the environment all at the same time. It is one of those rare win-win situations.

While growing up in northern India, away from her native place, the author was often intrigued by her agriculturist grandfather's constant letters to the Indian government. More than a decade after his death, she delves deep into the letters he left behind and

unravels a fascinating saga of her agriculturist family in her ancestral village in the southern state of Karnataka. In an evocative narrative that spans over a century, the author takes the readers on a journey to her ancestral land and depicts her grandfather's life through the various anecdotes she has collected over time. A dedicated farmer, he passionately fought for farmers' rights till the end of his life. Part memoir, part history and part reportage bordering on fiction, Autumn Showers narrates the dynamic tale of the quintessential Indian society woven closely around agriculture and also details the challenges agriculture today faces in India and the world.

Discovering the Kingdom of God in Eastern North Carolina. A small-town boy's adventures in the Land of Milk and Honey.

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.
