

How To Develop Emotional Health School Of Life Oliver James

How satisfied are you with your level of emotional and spiritual maturity? Do you feel discouraged by lack of progress in your spiritual life? Frustrated by failures to follow through on your good intentions? Embarrassed by discrepancies between your outer appearance and inward reality? Stuck in damaging emotions—such as anger, resentment, and revenge? If “yes” is your answer to any of these questions, be encouraged. In *Emotional Freedom*, Jane Ault shows you how to move from the bondage of emotional dysfunction to the freedom of emotional integrity so that you can grow toward spiritual maturity. Stories by those who have moved from anger to self-control, resentment to joy, and revenge to forgiveness inspire you to persevere in your healing journey. The “Tree” model of emotion expands your understanding of emotion. The dance called “Choosing Grace” tells you how to cooperate with God so that you can receive his grace and power. Maps of anger, resentment, and revenge help you recognize stages in the development of addictive emotion. Maps of self-control, joy, and mercy show you steps in the pathway to freedom. A study guide listing key concepts, plus questions for reflection and discussion, helps you integrate these new concepts into your everyday life. “This gem of a book offers us a key to release the shackles of dysfunction that keep us bound to an immature past. From personal experience and with great insight, compassion, a scriptural foundation, and incisive writing, Jane leads the reader from stoic brokenness to emerging freedom.” —Carolyn M. White, abd, MA, CASAC “Jane writes knowledgeably about recognizing destructive patterns in our lives, understanding the dynamics that fuel them, and moving forward with God to overcome them.” —Jean Coles, friend and fellow sojourner

This book takes a comprehensive approach to all aspects of mental health, holistically examining the cognitive, emotional, social, and spiritual dimensions of mental health. By examining mental health from a variety of perspectives, the authors have created a holistic view that incorporates public health, medicine and psychiatry, psychology, counseling, and health education. Both classic and contemporary sources support the basic premise of the text, that total health is a complex tapestry of many wellness factors, but that mental health is the integrating cloth woven throughout that lends substance and support to the quality of human experience. For mental or emotional health counselors.

Bringing together the results of studies of child services from diverse countries and cultures, this book covers a broad array of topical issues and social work interventions. It examines adolescent emotional health, children of substance abusers, childhood depression and teenage suicide, children’s weight and physical activity, language development in autistic children, and more. Chapters include a survey of the number of children living with substance-abusing parents in the UK, a study which helped identify several ways in which schools address adolescent emotional health issues, and a

review of a program that supports parents of young people with suicidal behavior. The book also examines the role child protective services efforts play in delinquency prevention and intervention.

`This publication is a valuable and timely contribution to the current investigations into the behaviours of children and young people that impact on their emotional health. The book will serve as a practical guide for schools addressing the problem as they see it, the case studies vividly illustrating situations and behaviours that teachers will readily recognise. This is a well structured book. [It] deserves to be read and can serve as a source of information on how various behaviours have been defined, investigated and addressed. It will be of value to any school, much more than a topical or interesting read but as the basis of an institutional response to a problem seriously affecting educational achievement for individuals and schools. It would particularly serve as a stimulus to in-service training for teachers and support staff' - George Varnava, Young Minds Magazine 'Each of the authors has considerable relevant expertise so the text is rich both in research data and examples, including case studies, from their experience. Readers will find a wealth of practical advice and encouragement that is balanced by the acknowledgement of the limitations of individual interventions and the potential costs, overt and hidden, of each one. A whole-school approach is advocated and exemplified, including schools that have considered the needs of the staff' - Child and Adolescent Mental Health `This work would be of use throughout all age ranges as the different problems and strategies are very easily accessible with a lot of proven, practical support. Professor Cowie and her colleagues have produced a valuable tool for use in all schools on both micro and macro level' - Education Review `The book is an impressive and useful handbook of advice and resources. More than that, because it presents so much evidence, it's able to show, rather than tell, how schools can improve life for their pupils and teachers' -

Gerald Haigh, TES Friday Magazine `This book is recommended for the wealth of practical information it contains about strategies that can help young people in distress' - Youth Studies Australia Secondary school is the place where young people are most constrained, observed and challenged to develop. This is not necessarily a stress free process, either for the young person, or for teachers and parents. This book describes behaviours, both disruptive and secretive, which indicates emotional distress. It looks at both the risk factors and the protective factors involved in emotional health, and addresses the impact of issues such as bullying, social exclusion, loss and bereavement. The authors show what schools can do to develop practices grounded in knowledge about the mental health issues which relate to young people. In an accessible way, they present a range of strategies which practitioners have shown to be effective. They focus especially on methods and policies, which have been scientifically evaluated, or which are considered best practice. Issues and interventions are illustrated throughout with case studies drawn from the authors' own practice and experience. Each of the authors has a long-standing interest in ways of creating supportive environments to prevent distress and to facilitate resilience in the young. This book is essential reading for secondary school teachers, educational psychologists, education welfare officers and all those with pastoral care responsibilities.

The silent ascendancy of a therapeutic ethos across the education system and into the workplace demands a book that serves as a wake up call to everyone. Kathryn Ecclestone and Dennis Hayes' controversial and compelling book uses a wealth of examples across the education system, from primary schools to university, and the workplace to show how therapeutic education is turning children, young people and adults into anxious and self-preoccupied individuals rather than aspiring, optimistic and resilient learners who want to know everything about the world. The chapters address a variety of thought-provoking themes, including how therapeutic ideas from popular culture dominate social thought and social policies and offer a diminished view of human potential how schools undermine parental confidence and authority by fostering dependence and compulsory participation in therapeutic activities based on disclosing emotions to others how higher education has adopted therapeutic forms of teacher training because many academics have lost faith in the pursuit of knowledge how such developments are propelled by a deluge of political initiatives in areas such as emotional
