A collection of moving short stories thematically linked by the emotion of loneliness follows a collection of varied characters as they search for relationships, only to find meaningful connections in the unlikeliest places. Winner of the Flannery O'Connor Award for Short Fiction.

With this 13th in the series of International Conferences on Fluid Sealing these meetings move into their third decade. To be precise it is now thirty-one years since BHRA, as it then was, convened, with no little trepidation, the first of these Conferences in Ashford, England. The massive set of proceedings now occupies a considerable length of shelf in my bookcase and represents a tremendous technological resource - over 400 separate papers. It is interesting that I seem to refer most often to the earlier volumes, probably most of all to the very first. Perhaps this is because this volume marks the beginning of "historic times", AD 0, for fluid sealing technology. There were of course important publications in this field even before 1961. A notable example is the seminal work of my predecessor at BHRA, Dr D. F. Denny, whose researches on reciprocating fluid power seals, "The sealing mechanism of flexible packings", was published in 1947 by a long since defunct government department, the Ministry of Supply. Another notable source is the Proceedings of the Institution of Mechanical Engineers' 1957 Conference on Lubrication and Wear. However, there is more to fluid sealing technology than just tribology, as we must now call lubrication and wear, interest in static seals has really come to the fore in recent years - witness the large batch of papers dealing with this subject in the present Conference.

Young Trace and Jill dream of having beautiful Christmas decorations they cannot afford. Does the copper pig hold answers to their prayers? What does it mean to have "the faith of a child"? Major advances in ultrasound, prenatal diagnosis and therapy, and fetal assessment are furthering fetal medicine and clinical perinatology. These developments include: progress in 3-dimensional and color Doppler ultrasound for insights into early embryonic structure and function, counseling for pre-embryonic research, genetic counseling and prenatal informed consent, the use of cardiotocograms (CTGs), ultrasound imaging, Doppler ultrasound, analysis of nucleated red blood cells, and a broad range of clinical topics ranging from the Internet to neonatal intensive care. Under the editorship of Dr. Frank Chervenak and Professors Asim Kurjak and Zoltan Papp, authors and editors of many respected books in this field, *The Fetus as a Patient: The Evolving Challenge* provides detailed, authoritative coverage of the latest developments in fetal medicine and clinical perinatology. Following an introductory chapter on the moral foundations of leadership in fetal medicine, the book presents 38 chapters in four sections dealing with new developments in ultrasound, the state of the art of prenatal diagnosis and therapy, the challenge of fetal assessment and current perspectives on clinical perinatology. The volume is extensively illustrated throughout and includes bibliographic references and index. *The Fetus as a Patient* elucidates the current work of the Board of Directors and invited speakers of the International Society of the Fetus as a Patient, which is dedicated to improving all dimensions of fetal diagnosis and therapy.

Unaware of his pirate ancestry and his clan's long-standing rivalry with the Hood family, accountant Morgan Cooke is shanghaied by his estranged father and placed at the forefront of the families' latest clash in the Caribbean, which is marked by the promise of a vast treasure. A first novel. 20,000 first printing.

A synopsis of the use of lasers in gynecology is presented in this book; it is supported by more than 10 years of experience and backed up by studies in the fields of experimental surgery, technical medicine and clinical gynecology. The authors show how laser-assisted preparation has broadened the spectrum of operative possibilities in gynecology. Major points of attention are experimental surgery and basic research, details of application with respect to specific indications, and future potential. Furthermore, the clear definition of the possibilities and limitations of laser technology puts an end to the highly stylized view of a patent wonder divorced from general operative standards. There is no doubt that users of laser technology stand on the threshold of a promising development and yet, despite the present elegant applications, the first steps to maturity are only now being taken.

GRAPHITE is an art magazine featuring over 100 pages of inspirational images, interviews and tutorials in an elegant quarterly format.

This paper describes a class of dynamic stochastic linear quadratic equilibrium models. A model is specified by naming lists of matrices that determine preferences, technology, and the information structure. Aggregate equilibrium allocations and prices are computed by solving a social planning problem in the form of an optimal linear regulator. Heterogeneity among agents is permitted. Several examples are computed.

The clinical specialty of adult nephrology has enjoyed spectacular growth during the past three decades. Such a statement is no less true for pediatric nephrology. This book stands in quiet testimony to that fact. Practitioners of pediatric nephrology are now concerned with the diagnosis and treatment of young patients with a widened spectrum of primary and secondary diseases of the kidneys and urinary tract, hypertension and disorders of water, electrolyte and acid-base metabolism. Their science, deriving from an exciting blend of physiology, morphology, pathology, immunology, biochemistry, microbiology, genetics and pharmacology, must also include an understanding of human developmental biology an insight that colleagues who practice adult nephrology require to a somewhat lesser extent. Dramatic, continuing advances in our understanding of the pathogenesis, pathophysiology, diagnosis and treatment of kidney diseases has led to a cascade of books and monographs on various aspects of the subject. Nevertheless, in view of the clear emergence of pediatric nephrology as a distinct medical specialty, it is most appropriate that a practical book, which focuses almost exclusively on approaches to the evaluation and diagnosis of young patients with kidney disease and related disorders, should appear. In that sense this book is unique. It provides an easily accessible, practical compendium or guide to the clinical investigation of all facets of kidney disease in children. Its special and unique emphasis is directed toward various approaches to the evaluation of such patients and the interpretation of associated laboratory or radiographical data.

Many of the key improvements to social conditions in the United Kingdom have been made by Christians. Most of us would be able to think of such key Anglican figures as William Wilberforce, Anthony Ashley Cooper, Earl of Shaftesbury or Dr Thomas Barnardo, but lesser known contributions were made behind the scenes by significant members of the Non-Conformist Churches. This book traces the Free Church contribution to society from 1800 to the present day. It looks at the work of campaigners, co-operative societies, philanthropists and politicians, and traces the ways in which conditions in slums, education, and industry were improved, including work with women and with black and ethnic minorities. There is a growing interest in the part the churches can play today in community development and in the building of social capital. This book will show that some of the things now seen as government initiatives had their origins in the work of Free Church pioneers.

The new Seventh Edition of the award-winning classic prepares its users to deliver expert care in this challenging nursing specialty. It addresses neuroanatomy, assessment, diagnostic evaluation and management of the complete range of neurological disorders for which nurses provide patient care, including trauma, stroke, tumors, seizures, headache, aneurysms, infections, degenerative disorders and features new chapters on neurological critical care and peripheral neuropathies. The new edition has been thoroughly revised to reflect standards of care based on evidence-based practice. It now includes separate pathophysiology sections in each chapter, new resource guides, such as internet sites and professional and patient information sources, key points summaries, evidence-based boxes, and nursing research features.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Achieving 'Best Practice' In Perineal Care Is One Of The Most Widely Debated Issues In Midwifery Today. This Important Book Describes For The First Time In One Volume A Range Of Physiological, Practice, Education And Policy Issues To Inform Perineal Management. Chapters Are Presented On Anatomy And Physiology, Assessment Of Trauma, Suturing Methods And Materials, Clinical Governance, Postpartum Health And Challenges To Implementing Evidence-Based Practice. With Contributions From Internationally Acknowledged Experts, The Book Will Be An Invaluable Resource For Both Clinicians And Women.

The long-departed Steve McQueen is still the coolest man on two wheels. Get an intimate look at his coolest bikes right here, right now, in McQueen's Motorcycles. Even thirty years after his death, Steve McQueen remains a cultural icon. His image continues to appear in advertising and pop culture and his fan base spans from car lovers to racing enthusiasts to motorcycle obsessives. In his movies, McQueen's character always had an envy-inducing motorcycle or car, but in his personal life, motorcycles were always McQueen's first true love. McQueen's Motorcycles focuses on the bikes that the King of Cool raced and collected. From the first Harley McQueen bought when he was an acting student in New York to the Triumph "desert sleds" and Huskys he desert raced all over California, Mexico, and Nevada, McQueen was never without a stable of two wheelers. His need for speed propelled him from Hollywood into a number of top off-road motorcycle races, including the Baja 1000, Mint 400, Elsinore Grand Prix, and even as a member of the 1964 ISDT team in Europe. Determined to be ahead of the pack, McQueen maintained his body like it was a machine itself. He trained vigorously, weight lifting, running, and studying martial arts. Later in his life, as he backed away from Hollywood, his interests turned to antique bikes and he accumulated an extensive collection, including Harley-Davidson, Indian, Triumph, Brough Superior, Cyclone, BSA, and Ace motorcycles. Today, McQueen still has the Midas touch; anything that was in the man's possession is a hot commodity. McQueen's classic motorcycles sell for top dollar at auctions, always at a multiple of what the same bike is worth without the McQueen pedigree. McQueen's Motorcycles reveals these highly sought-after machines in gorgeous photography and full historical context.

For years track days have been popular activities for European motorcyclists. In recent years it has become a very popular activity in the U.S. as well. As traffic laws become increasingly draconian, roads become increasingly congested, and motorcycles become increasingly capable, more people are taking their bikes to race tracks. Currently there are a number of organizations catering to people who attend track days. But many people who want to ride on racetracks don't attend track days because they don't know how to prepare themselves or their motorcycles for the racetrack. This book will provide tell them everything they need to know to hit the racetrack: how to prepare their motorcycles, how to find organizations that sponsor track days, where to attend track days, specific information for the major racetracks in the United States, information on track schools around the country, and much, much more.About the AuthorKent Larson, an accomplished racer and a control rider for NESBA, one of the country's leading track day organizations, contributed the chapter on track days to our high performance riding book Total Control. Larson lives in Woodbury, Minnesota.

"The Farm Technical Manual is a reference book that attempts to bring into one place a wide variety of essential technical information required by farmers and others involved in the farming industry. It has been designed with the practitioner in mind, providing data gleaned from many sources, but presented in non-technical language wherever possible. It lists useful web-sites and other reference sources that readers can explore. The Manual does not purport to be exhaustive and it is intended to operate as a guide only. Wherever possible other references are given to augment material contained here."--Publisher.

No other Hollywood star has been so closely linked with cars and bikes, from the 1968 Ford Mustang GT Fastback he drove in Bullitt (in the greatest car chase of all time) to the Triumph motorcycle of The Great Escape. McQueen's Machines gives readers a close-up look at the cars and motorcycles McQueen drove in movies, those he owned, and others he raced. With a foreword by Steve's son, Chad

McQueen, and a wealth of details about of the star's racing career, stunt work, and car and motorcycle collecting, McQueen's Machines draws a fascinating picture of one outsized man's driving passion. Now in paperback.
