This book addresses sustainability thinking and the bigger picture, by taking into consideration how and from where contemporary schools of thought emerged approximately a quarter-century ago. Evidence from the literature illustrates a number of key concepts and techniques that have been tested and continue to be tested, within various multi-disciplinary fields, on societal functionality. Research into sustainable societies needs to be sound, ethical, and creative. A cross-sectoral, interdisciplinary examination of challenges and strategies is used to interlink sustainability thinking and human-nature relations. With an ever-growing number of people now concentrated within urban areas, providing not only environmental quality and livable space, but also security and resilient urban systems, is becoming increasingly important. This urbanization trend has overlapped with environmental degradation, consumption of natural resources, habitat loss, and overall ecosystem change. Consequently, the goal is for cleaner, safer societies – with higher standards of living – to excel in support of current and future generational communities. The book tackles these challenges by integrating environmental scholarship, economic evaluation, and urban strategies under one umbrella of thought. The relational paradigms presented include examples that correlate developed and developing countries, socioeconomics and community development, and governance of knowledge and education. As such, the book argues, furthering of knowhow should be accessible and shared in order to achieve maximum innovation and benefit. Sustainability thinking, after all, is a metric for intrinsic human-nature relations in terms of past performance, present development, and future goals. This book discusses this metric and offers novel approaches to growing societies and what we can do next. The authors explore the complicated relationship between art and anthropology as it has been probed in the work of contemporary artists.

The school of thought surrounding the urban ecosystem has increasingly become in vogue among researchers worldwide. Since half of the world's population lives in cities, urban ecosystem services have become essential to human health and wellbeing. Rapid urban growth has forced sustainable urban developers to rethink important steps by updating and, to some degree, recreating the human–ecosystem service linkage. Assessing, as well as estimating the

losses of ecosystem services can denote the essential effects of urbanization and increasingly indicate where cities fall short. This book contains 13 thoroughly refereed contributions published within the Special Issue “Urban Ecosystem Services”. The book addresses topics such as nature-based solutions, green space planning, green infrastructure, rain gardens, climate change, and more. The contributions highlight new findings for landscape architects, urban planners, and policymakers. Important future cities research is considered by looking at the system connectivity between the social and ecological sphere—via varying forms of urban planning, management, and governance. The book is supported by methods and models that utilize an urban sustainability and ecosystem service-centric focus by adding knowledge-base and real-world solutions into the urbanization phenomenon.

Sanskrit-Subodhini: A Sanskrit Primer marks the culmination of Professor Deshpande's experience of teaching Sanskrit at the University of Michigan for over twenty-five years. Tested in classes at Michigan and elsewhere and successively improved for over twenty years, the teaching materials in the book now offer an effective tool to learn and teach Sanskrit. It aims at teaching Sanskrit as a language, rather than as a religious or mystical entity. It also simplifies the process of learning Sanskrit by dissociating this language-learning process from the heavy burdens imposed both by the tradition of Indo-European linguistics and the tradition of indigenous Sanskrit grammarians in India. By treating Sanskrit as a productive language, rather than as a dead language merely to be deciphered, the book represents a significant advance over the traditional Western approach to the study of Sanskrit. Work on this book began in 1976, and now almost two generations of Professor Deshpande's students have used successively improved versions. The book's examples include many modified versions of classical Sanskrit passages from epic texts such as The Mahabharata and The Ramayana. The book also contains examples from Hindu, Buddhist, and Jain traditions, as well as samples of Sanskrit poetry and satire. Madhav M. Deshpande is Professor of Sanskrit and Linguistics in the Department of Asian Languages and Cultures, University of Michigan, where he has been on the faculty since 1972. His research relates to the fields of Paninian linguistics, historical linguistics, and sociolinguistics, as well as the cultural and linguistic history of India. Besides his research publications, Professor Deshpande has participated in Sastric and literary debates in Sanskrit and has also published Sanskrit poems and plays.

Surviving a shark attack that cost her an arm, Jane, an aspiring artist, reevaluates her ambitions and sense of identity while harboring a crush on her attractive tutor and considering a relationship with a boy from her science class. By the award-winning author of Z Is for Moose.

Boy meets dot-com, boy falls for dot-com, boy flees dot-com in horror. So goes one of the most perversely hilarious love stories you will ever read, one that blends tech culture, hero worship, cat litter, Albanian economics, venture capitalism, and free bagels into a surreal cocktail of delusion. In 1998, when Amazon.com went to temp agencies to recruit people, they gave them a simple directive: send us your freaks. Mike Daisey -- slacker, onetime aesthetics major, dilettante -- seemed perfect for the job. His ascension from lowly temp to customer service representative to business development hustler over the course of twenty-one dog years is the stuff of both dreams and nightmares. With lunatic precision, Daisey describes the lightless cube farms in which book orders were scrawled on Post-its while technicians struggled to bring computers back online; the fourteen-hour days fueled by caffeine, fanaticism, and illicit day-trading from office desks made from doors; his strange compulsion to send free books to Norwegians; and the fevered insistence of BizDev higher-ups that the perfect business partner was Pets.com -- the now-extinct company that spent all its assets on a sock puppet. In these pages, you'll meet Warren, the cowboy of customer service, capable of verbally hog-tying even the most abusive customer; Amazon employee #5, a reclusive computer gamer worth a cool \$300 million, who spends at least six hours a day locked in his office killing goblins; and Jean-Michele, Mike's girlfriend and sparring partner, who tries to keep him grounded, even as dot-com mania seduces them both. At strategic intervals, the narrative is punctuated by hysterically honest letters to CEO Jeff Bezos -- missives that seem ripped from the collective unconscious of dot-com disciples the world over. *21 Dog Years* is an epic story of greed, self-deception, and heartbreak, a wickedly funny anthem to an era of bounteous stock options and boundless insanity.

How does a small town in Iowa deal with an abundance of pumpkins, just as Halloween approaches?

Since the Mediterranean connects cultures, Mediterranean studies have by definition an intercultural focus. Throughout the modern era, the Ottoman Empire has had a lasting impact on the cultures and societies of the Southern and Eastern Mediterranean. However, the modern Balkans are usually studied within the context of European history, the southern Mediterranean within the context of Islam. Although it makes sense to connect both regions, this is a vast field and requires a command of different languages not necessarily related to each other. Investigating both Greek and Arabic sources, this book will shed some light on the significance of ideas in the political transitions of their time and how the proponents of these transitions often became so overwhelmed by the events that they helped trigger adjustments to their own ideas. Also, the discourses in Greek and Arabic reflect the provinces of the Ottoman Empire and it is instructive to see their differences and commonalities which helps explain contemporary politics.

Jacques Derrida is, in the words of the New York Times, "perhaps the world's most famous philosopher—if not the only famous philosopher." He often provokes controversy as soon as his name is mentioned. But he also inspires the respect that comes from an illustrious career, and, among many who were his colleagues and peers, he inspired friendship. *The Work of Mourning* is a collection that honors those friendships in the wake of passing. Gathered here are texts—letters of condolence, memorial essays, eulogies, funeral orations—written after the deaths of well-known figures: Roland Barthes, Paul de Man, Michel Foucault, Louis

Althusser, Edmond Jabès, Louis Marin, Sarah Kofman, Gilles Deleuze, Emmanuel Levinas, Jean-François Lyotard, Max Loreau, Jean-Marie Benoist, Joseph Riddel, and Michel Servière. With his words, Derrida bears witness to the singularity of a friendship and to the absolute uniqueness of each relationship. In each case, he is acutely aware of the questions of tact, taste, and ethical responsibility involved in speaking of the dead—the risks of using the occasion for one's own purposes, political calculation, personal vendetta, and the expiation of guilt. More than a collection of memorial addresses, this volume sheds light not only on Derrida's relation to some of the most prominent French thinkers of the past quarter century but also on some of the most important themes of Derrida's entire oeuvre—mourning, the "gift of death," time, memory, and friendship itself. "In his rapt attention to his subjects' work and their influence upon him, the book also offers a hesitant and tangential retelling of Derrida's own life in French philosophical history. There are illuminating and playful anecdotes—how Lyotard led Derrida to begin using a word-processor; how Paul de Man talked knowledgeably of jazz with Derrida's son. Anyone who still thinks that Derrida is a facetious punster will find such resentful prejudice unable to survive a reading of this beautiful work."—Steven Poole, *Guardian* "Strikingly simpatico meditations on friendship, on shared vocations and avocations and on philosophy and history."—*Publishers Weekly*

Paul's reading of the Old Testament continues to witness to the significance of reading the Old Testament in a Christian way. This study argues that a theological approach to understanding Paul's appeal to and reading of the Old Testament, especially Isaiah, offers important insights into the ways in which Christians should read the Old Testament and a two-testament canon today. By way of example, this study explores the ways in which Isaiah 40-66's canonical form presents the gospel in miniature with its movement from Israel to Servant to servants. It is subsequently argued that Paul follows this literary movement in his own theological reflection in 2 Corinthians 5:14-6:10. Jesus takes on the unique role and identity of the Servant of Isaiah 40-55, and Paul takes on the role of the servants of the Servant in Isaiah 53-66. From this exegetical exploration conclusions are drawn in the final chapter that seek to apply a term from the history of interpretation to Paul's reading, that is, the plain sense of Scripture. What does an appeal to plain sense broker? And does Paul's reading of the Old Testament look anything like a plain sense reading? Gignilliat concludes that Paul is reading the Old Testament in such a way that the literal sense and its figural potential and capacity are not divorced but are actually organically linked in what can be termed a plain sense reading.

A teenager struggles through physical loss to the start of acceptance in an absorbing, artful novel at once honest and insightful, wrenching and redemptive. (Age 12 and up) On a sunny day in June, at the beach with her mom and brother, fifteen-year-old Jane Arrowood went for a swim. And then everything -- absolutely everything -- changed. Now she's counting down the days until she returns to school with her fake arm, where she knows kids will whisper, "That's her -- that's Shark Girl," as she passes. In the meantime there are only questions: Why did this happen? Why her? What about her art? What about her life? In this striking first novel, Kelly Bingham uses poems, letters, telephone conversations, and newspaper clippings to look unflinchingly at what it's like to lose part of yourself - and to summon the courage it takes to find yourself again.

Aluk is a young Kurdish woman who gets adopted by a childless European academic couple, after a common climb to the summit of the biblical mountain Ararat. She follows her new parents to Crecheville, where she starts Law studies. She is intrigued by the idea that humans' destiny is to permanently desire more: that is a blessing and curse at the same time. She starts her career joining the ICRC (Inter. Committee of the Red Cross), serving in Iraq, Eastern Sudan, and Jerusalem. Three years later Aluk metamorphoses into a Diplomat for her adoptive country working in Israel, Morocco, Nigeria, Russia, Caucasus, Iran, Uzbekistan/Tajikistan, a peace mission to Afghanistan introduces her to a cosmos following its own rules. Negotiating with the Taliban and their nemesis, Ahmad Shah Massoud, gives her a lasting lesson: "if you can, trust in God, if not, trust nobody." Her defence ministry calls her to help out in coordinating its intelligence services, but soon her ministry needs Aluk in Kenya, where she discovers a powerful motivator "greed without borders". Aluk continues her career in Israel again and then as Ambassador to Sudan/Eritrea, Vietnam and Poland. Once in retirement Aluk tries to give something back to her Kurdish roots. She happens to know a key aid to Boris Johnson, Ambassador Tim Barrow, so she gets an appointment with the PM. She is not trying to get another (this time Kurd oriented) "Balfour declaration" from London: hence she is not aiming at a Kurdish State but more realistically for promis-

ing cooperation domains within a Union of Levante. This Union could first, like it happened not so long ago in Europe, start with creating conditions, for the regional countries to cooperate with each other. Exploring political and cultural diversities in many of the worlds most challenged nations, she delivers services with respect and empathy for all humans and other beings giving us on her way a glance into chronic problems of most societies. Andrej Motyl, born 1956 in Western Carpathian Mountains in former Czechoslovakia. Due to the suppression of the Prague Spring August 1968 his family emigrates to Switzerland. After Law Studies in Zürich and language courses in Paris, he joins the International Committee of the Red Cross as a Delegate. 1989 he passes the Exams into the Swiss Diplomatic Service, in which he serves until 2018. He also wrote “Tierischer Ernst, eine Erzählung für Iraner, Libanesen, Tessiner und andere”. He paints intensively watercolours. Andrej lives with his wife Christine between Zug and Lugano in Switzerland. Their son Matteu is a Student of Economics in Warsaw.

Sheep hunt for a birthday present and make havoc of the shop, only to discover they haven't the money to pay for things. The KiddyCAT is an easily administered standardized and normed test procedure that makes it possible to quickly determine if the speech-associated attitude of a preschool or kindergarten child is like that of youngsters who stutter or those who do not. A child's attitude toward his or her speech is a significant dimension that serves to supplement dysfluency in the identification of children who stutter. It is also an element that needs to be evaluated relative to clinical decision making.

Many famous texts from classical antiquity—by historians like Thucydides, tragedians like Sophocles and Euripides, the comic poet Aristophanes, the philosopher Plato, and, above all, Homer—present powerful and profound accounts of wartime experience, both on and off the battlefield. These texts also provide useful ways of thinking about the complexities and consequences of wars throughout history, and the concept of war broadly construed, providing vital new perspectives on conflict in our own era. Our Ancient Wars features essays by top scholars from across academic disciplines—classicists and historians, philosophers and political theorists, literary scholars, some with firsthand experience of war and some without—engaging with classical texts to understand how differently they were read in other times and places. Contributors articulate difficult but necessary questions about contemporary conceptions of war and conflict. Contributors include Victor Caston, Page duBois, Susanne Gödde, Peter Meineck, Sara Monoson, David Potter, Kurt Raaflaub, Arlene Saxonhouse, Seth Schein, Nancy Sherman, Hans van Wees, Silke-Maria Weineck, and Paul

Paul and Isaiah's Servants
Paul's Theological Reading of Isaiah 40-66 in 2 Corinthians 5:14-6:10
Bloomsbury Publishing
Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

In this companion to the acclaimed *Z Is for Moose*, Moose infiltrates a book about shapes (because he loves shapes, naturally) and it is up to his best friend, Zebra, to restore order and save the day. Another triumph from the award-winning team of Kelly Bingham and Paul O. Zelinsky. This hilarious book manages to illustrate a fact or two about shapes while providing a three-dimensional stomping ground for best friends Moose and Zebra. What will happen? Who will save the day? It's all up in the air until the final page, where Moose and Zebra (and Cat, too) create a perfect—and perfectly heartwarming—ending. This stand-alone companion to *Z Is for Moose* features a multilayered story told through text, asides, conversation bubbles, and pictures. Themes of friendship, exploration, and conflict resolution—and of course the concept of shapes, including the shape of a book—make this an ideal read-aloud for the elementary school classroom and for home!
