In this new edition of their groundbreaking book *Strategies That Work*, Stephanie Harvey and Anne Goudvis share the work and thinking they've done since the second edition came out a decade ago and offer new perspectives on how to explicitly teach thinking strategies so that students become engaged, thoughtful, independent readers. Thirty new lessons and new and revised chapters shine a light on children's thinking, curiosity, and questions. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. Other fully revised chapters focus on digital reading, strategies for integrating comprehension and technology, and comprehension across the curriculum. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Updated bibliographies, including the popular "Great Books for Teaching Content," are accessible online. Since the first publication of *Strategies That Work*, more than a million teachers have benefited from Steph and Anne's practical advice on creating classrooms that are incubators for deep thought. This third edition is a must-have resource for a generation of new

teachers--and a welcome refresher for those with dog-eared copies of this timeless guide to teaching comprehension.

Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. *Preparing Teachers* addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher preparation programs, the sorts of instruction and experiences teacher candidates receive in preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. *Preparing Teachers* also identifies a need for a data collection model to provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now.

Death and taxes come later; what seems inevitable for children is the idea that, after spending the day at school, they must then complete more academic assignments at home. The predictable results: stress and conflict, frustration and exhaustion. Parents respond by reassuring themselves that at least the benefits outweigh the costs. But what if they don't? In *The Homework Myth*, nationally known educator and parenting expert Alfie Kohn systematically examines the usual defenses of homework--that it promotes higher achievement, "reinforces" learning, and teaches study skills and responsibility. None of these assumptions, he shows, actually passes the test of research, logic, or experience. So why do we continue to administer this modern cod liver oil -- or even demand a larger dose? Kohn's incisive analysis reveals how a mistrust of children, a set of misconceptions about learning, and a misguided focus on competitiveness have all left our kids with less free time and our families with more conflict. Pointing to parents who have fought back -- and schools that have proved educational excellence is possible without homework -- Kohn shows how we can rethink what happens during and after school in order to rescue our families and our children's love of learning.
