Are you just playing—or playing to win? Strategy is not complex. But it is hard. It's hard because it forces people and organizations to make specific choices about their future—something that doesn't happen in most companies. Now two of today's best-known business thinkers get to the heart of strategy—explaining what it's for, how to think about it, why you need it, and how to get it done. And they use one of the most successful corporate turnarounds of the past century, which they achieved together, to prove their point. A.G. Lafley, former CEO of Procter & Gamble, in close partnership with strategic adviser Roger Martin, doubled P&G's sales, quadrupled its profits, and increased its market value by more than \$100 billion in just ten years. Now, drawn from their years of experience at P&G and the Rotman School of Management, where

Martin is dean, this book shows how leaders in organizations of all sizes can guide everyday actions with larger strategic goals built around the clear, essential elements that determine business success—where to play and how to win. The result is a playbook for winning. Lafley and Martin have created a set of five essential strategic choices that, when addressed in an integrated way, will move you ahead of your competitors. They are: • What is our winning aspiration? • Where will we play? • How will we win? • What capabilities must we have in place to win? • What management systems are required to support our choices? The stories of how P&G repeatedly won by applying this method to iconic brands such as Olay, Bounty, Gillette, Swiffer, and Febreze clearly illustrate how deciding on a strategic approach—and then making the right choices to support it—makes the difference between just playing the game and actually winning.

In the game of life there are no time outs, no overtimes. You only get one chance to play the game. The question you have to ask yourself is "At what level do I want to play - do I want to wait on the sidelines of life or do I want to win." This book helps you win! "Many parents work more hours outside of the home and their lives are crowded with more obligations than ever before; many children spend their evenings and weekends trying out for all-star teams, traveling to regional and national tournaments, and eating dinner in the car while being shuttled between activities. In this vivid ethnography, based on almost 200 interviews with parents, children, coaches and teachers, Hilary Levey probes the increase in children's participation in activities outside of the home, structured and monitored by their parents, when family time is so scarce. As the parental "second shift" continues to grow, alongside it a second shift for children has emerged--especially among the middle- and upper-middle classes--which is suffused with competition rather than mere participation. What motivates these particular parents to get their children involved in competitive activities? Parents' primary concern is their children's access to high quality educational credentials--the biggest bottleneck standing in the way of, or facilitating entry into, membership in the upper-middle class. Competitive activities, like sports and the arts, are seen as the essential proving ground that will

clear their children's paths to the Ivy League or other similar institutions by helping them to develop a competitive habitus. This belief, motivated both by reality and by perception, and shaped by gender and class, affects how parents envision their children's futures; it also shapes the structure of children's daily lives, what the children themselves think about their lives, and the competitive landscapes of the activities themselves"--

Winning at competitive games requires a results-oriented mindset that many players are simply not willing to adopt. This book walks players through the entire process: how to choose a game and learn basic proficiency, how to break through the mental barriers that hold most players back, and how to handle the issues that top players face. It also includes a complete analysis of Sun Tzu's book *The Art of War* and its applications to games of today. These foundational concepts apply to virtually all competitive games, and even have some application to "real life." Trade paperback. 142 pages.
