Often with the very best intentions, Americans expose their children to overwhelming pressures, pressures that can lead to low self-esteem, to teenage pregnancy, and even to teenage suicide. By blurring the boundaries of what is age appropriate, by expecting—or imposing—too much too soon, we force our kids to grow up too fast, to mimic adult sophistication while secretly yearning for innocence. With the first edition of *The Hurried Child*, David Elkind emerges as the voice of reason, calling our attention to the crippling effects of hurrying. But in the decade since this book first appeared, a new generation of parents has inadvertently stepped up the assault on childhood, misled by the new and comforting rhetoric of childhood "competence." Now Dr. Elkind has thoroughly revised this enormously successful book to debunk the notion of "competence" that has children racing off to early enrichment programs, burdened by the pressure to "achieve," and coming home alone to an empty house after school. He sees "competence" as a notion meant to rationalize the needs of adults, not to serve the genuine needs of kids, a notion that has fourth graders dieting to fit into designer jeans and children of divorce

asked to be the confidants of their troubled parents. In updating this new edition, Dr. Elkind takes a detailed and up-to-the-minute look at the world of today's kids in terms of education, movies, television, rock & roll, and social trends, to see where the hurrying occurs and why. And as before, he offers parents and teachers insight, advice, and hope for encouraging healthy development while protecting the joy and freedom of childhood.

In his debut book, Martin Summer aims to help readers find nature in an urban world. He discusses how our modern lives differ from the lifestyles of our ancestors. He then proceeds to cover six big problems of urbanization and their destructive impact on our lives. Practical solutions follow each discussed danger. In the next part of the book, the author reveals what connecting with nature means in today's world and why it's possible to do so even in a big city. Summer provides easy and fun ideas to use all the senses on your natural outings. He discusses the tricky subject of finding a compromise between technology and nature. Through ten elements, he explains how to turn your home into a nature-friendly oasis. Lastly, he emphasizes the importance of nature stewardship and how to espouse it in your everyday life. If you're wishing to develop a deeper connection with life around you, *Connecting With Life* is the blueprint you need.

Saskatchewan, and the microbiome teach us about how to care for people and the Earth at the same time? In this richly layered book, Didi Pershouse takes us on a fast-moving, sharp-witted journey through her own life: from growing up with the neurosurgeon who accidentally discovered the seat of memory in the brain, to working in a smoke-filled office at New York magazine, to her career as an innovative acupuncturist in Vermont, and on to a passion for close-knit communities, grazing cows, and soil restoration as solutions to much of what ails us. Along the way, she unfolds a surprising new take on the story of our time: how the germ theory of disease joined with a profit-based economy, and unwittingly led to a "sterilization" of medicine, agriculture, and even our social lives. This 150-year detour has brought about the near destruction of our climate as well as a great forgetting of the power of connection. By documenting a scientific understanding of the intelligence of the whole, Pershouse nudges us awake with a hopeful view and shows us how to reclaim the rich, "fertile" lives we are meant for.

People's experiences of racial inequality in adulthood are well documented, but less attention is given to the racial inequalities that children and adolescents face. Growing Up in America provides a rich, first-hand account of the different social worlds that teens of diverse racial and ethnic backgrounds experience. In their own words, these American teens describe, conflicts with parents, pressures from other teens, school experiences, and religious beliefs that drive their various understandings of the world. As the book reveals, teens' unequal experiences have a significant impact on their adult lives and their potential for social mobility. Directly confronting the constellation of advantages and disadvantages white, black, Hispanic, and Asian teens face today, this work provides a framework for understanding the relationship between socialization in adolescence and social inequality in adulthood. By uncovering the role racial and ethnic differences play early on, we can better understand the sources of inequality in American life.
