International experts provide a comprehensive collection of original research and theory on how parental styles and the effects of culture are interconnected. Written from diverse perspectives, this unique resource reveals deep insight into these relationships by focusing on the individuals, the structure of the family, and societal and cultural influences. Parental relations and cultural belief systems both play integral parts on how socialization and development occur in children. Parent-Youth Relations: Cultural and Cross-Cultural Perspectives presents several viewpoints, some comparing similarities and differences across societies or nations, others exploring relationships within a single culture.
