Science Explorer: Life, Earth, and Physical Science is a comprehensive series that provides a balanced focus of Life, Earth, and Physical Science topics in each book.

This book provides readers with an Earth system perspective and engages them in active learning and inquiry about their home planet. It contains readings, questions, and exercises that will cultivate a greater appreciation for the planet Earth and its inhabitants, and demonstrate how relevant Earth Science is to our lives and communities. Recurring themes—interactions of spheres, scale, cycles, energy, humans and the earth system—are woven throughout the five chapters which cover an introduction to the earth system, geosphere, hydrosphere, atmosphere, and cosmosphere. For anyone who wants to explore the science of the Earth.

1. Magnetism and Electromagnetism 2. Electric Charges and Current 3. Electricity and Magnetism at Work 4. Electronics
