During its short 20 year history High Performance Liquid Chromatography (HPLC) has won itself a firm place amongst the instrumental methods of analysis. HPLC has caused a revolution in biological and pharmaceutical chemistry.

Approximately two thirds of the publications on HPLC are concerned with problems from this area of life science.

Biotechnology, where it is necessary to isolate substances from complicated mixtures, is likely to give further impetus to the dissemination of modern liquid chromatography in columns, particularly on the preparative scale. This book presents, by means of examples, the application of HPLC to various fields, as well as fundamental discussions of chromatographic methods. The quality of the analytical result is decisively dependent on the qualities of the equipment employed (by Colin, Guiochon, and Martin). Especially the demands are discussed that are placed on the components of the instrument including those for data acquisition and processing. The section on "quantitative analysis" (by ABhauer, Ullner) covers besides the principles also the problems of ensuring the quality of the data in detail. The basic problems arising by enlarging the sample size to preparative dimensions and the requirements put on the apparatus are discussed in the section on "preparative applications" (by Wehrli).

Music, and Culture provides a comprehensive history of electronic music, covering key composers, genres, and techniques used in analog and digital synthesis. This textbook has been extensively revised with the needs of students and instructors in mind. The reader-friendly style, logical organization, and pedagogical features of the fifth edition allow easy access to key ideas, milestones, and concepts. New to this edition:

- A companion website, featuring key examples of electronic music, both historical and contemporary.
- Listening Guides providing a moment-by-moment annotated exploration of key works of electronic music.
- A new chapter—Contemporary Practices in Composing Electronic Music.
- Updated presentation of classic electronic music in the United Kingdom, Italy, Latin America, and Asia, covering the history of electronic music globally.
- An expanded discussion of early experiments with jazz and electronic music, and the roots of electronic rock.
- Additional accounts of the vastly under-reported contributions of women composers in the field.
- More photos, scores, and illustrations throughout.

The companion website features a number of student and instructor resources, such as additional Listening Guides, links to streaming audio examples and online video resources, PowerPoint slides, and interactive quizzes.

How can you leverage the value of your company's data? Well over a century ago oil drove the development of innovations such as the internal combustion engine, central heating and plastics, changing our world and our economy. Oil, as a technology, fueled an economic force that inexorably changed the way people lived and worked. Today, data is fueling a very similar change: it is the driving force for new business models and disruptive technologies that impact companies in every imaginable industry. The New Oil shows how data changes the traditional business paradigm. How it impacts not just high-tech, high-profile companies, but also old-school, low-tech industries all around the world; data lives and breathes within every single company. In The New Oil, Arent van 't Spijker explains how companies such as Google, Nike and Adara are leveraging a 'Data Driven Strategy'. Many other examples highlight the applications and commercial potential for data. Van 't Spijker describes five typical business models for monetizing data that help you to develop viable business models for leveraging data in your own company. He then shows how to successfully put these business models to practice. Above all, he will inspire you to follow in the footsteps of market
