The Fourth Book of Occult Philosophy, by Henry Cornelius Agrippa and unnamed others, is considered one of the cornerstones of Western magic, and the grimoires it contains are among the most important that exist in the Western tradition. For more than three hundred years, this mysterious tome has been regarded as difficult or even impossible to understand—until now. Occult scholar Donald Tyson presents a fully annotated, corrected, and modernized edition of Stephen Skinner's 1978 facsimile edition of the original work, which was six tracts published as one volume in 1655. For the first time, these classic works of Western magic have been rendered fully accessible to the novice practitioner, as well as occult scholars and skilled magicians. Tyson presents clear instruction and practical insight on a variety of magic techniques, providing contemporary magicians with a working grimoire of the arcane. - Astrology - History - Geomancy - Ceremonial Magic - The Nature of Spirits, Angels, and Demons - Geomantic Astronomy - Necromancy - Invocation and Evocation of Spirits

Horary Astrology Re-examined is a detailed and highly informative book, demonstrating clearly and unambiguously that traditional methods are applicable to all astrology. There is no division between different 'branches'. Barbara Dunn

examines the methods by which astrologers of the past evaluated planetary strengths in order to make a judgement on a Question, Nativity, Election or any other type of chart. These evaluations provide a platform for judgement today, in just the same way as they did over a thousand years ago. For all charts, the process of evaluation is broadly the same, what Coley calls the "short comprehensive and approved rules of Art". The focus of this work is Questions and the aim practical rather than philosophical.

In Triplicity, the first installment in a series known as the Terror Project, you'll find a trio of dead women with three very different tales. BRANDO AND BAD CHOICES by Stacey Longo A vain woman learns firsthand if there's an afterlife . . . and if one can find redemption, even in hell. STEEL by Tony Tremblay A young woman leads a group of survivors in a dangerous, dystopian world. THE CHRISTMAS SPIRIT by Rob Smales A mother-in-law explains how a holiday tradition got its decidedly spiritual start. " . . . a creepy yet heartfelt collection of horror and suspense that is entirely worth reading. Five out of five blood-spattered stars." Jeanette Andromeda, horormade.com "The ingredients in these three tales form a rich stew with a bit of something for everyone: an unexpectedly spirited Christmas, a taste of post-apocalyptic treachery, and a view of hell that'll make you careful what you wish for. Eat hearty!" Melissa Crandall, author of

Research into Islamic science and technology is still in its early stages, but there is now sufficient material available for a preliminary study. Volume IV is intended to fill a gap which deserves a major multi-volume work. Part I is a review of the history of science in Islam. It deals with the contribution of Islamic civilization to mathematics, astronomy, and physics, which have long been acknowledged, but also advances made by Muslim scientists in the fields of cosmology, geology and mineralogy, zoology, veterinary science and botany.

The present volume offers the first critical edition, accompanied by an English translation, of *Liber nativitatum* (Book of Nativities) and *Liber Abraham Iudei de nativitatibus* (Book on Nativities by Abraham the Jew), two astrological treatises in Latin that were written by Abraham Ibn Ezra or attributed to him.

This book endeavours to show in a clear and simple manner the useful and practical

truth that underlies the so-called occult study of reading character and disposition by the “period of birth”, and the meaning of the number of each day and the influence of such things on human life. It will, I hope, be seen in reading these pages how perfect is the mechanism of the Universe, by which certain characteristics, and even details as to health, may be traced by a study of such things. In the present book I have drawn largely from my own experiences in this study of character, and I may safely state that there is not a rule I have given concerning character tendencies or health, which has not been thoroughly verified by me in my own work, which has extended in a professional way over a period of more than forty years.

This is the first systematic presentation of Hellenistic astrology to the modern astrological world, and as such it uncovers rigorous techniques that have been lost to us for centuries. How exactly did ancient astrologers assess a chart for fame, career, and parents, love, and happiness? This book surveys ancient depictions of planets, affiliations between the planets and the zodiac, lots, houses or places, aspects, orientality, and fixed stars. The final chapters survey predictive systems used by ancient astrologers. Ancient natal and predictive techniques are applied to the charts and lives of over forty well-known historical and contemporary figures. Students and professional astrologers will find this book a treasure of astrological insight, technique, and new interpretative possibilities. Not only will you gain knowledge of how ancient astrologers practiced their trade, but you will also have new tools that apply to modern

life.

Xandra Daniels, resident curvy lady at Wicked Ink, believed for so long she was merely a convenient body for two of her friends with benefits. Three people who were oblivious to what was obvious to others. Three souls that wasted years only to recognize they all needed each other to be happy.

Strokes of genius come rarely in life. This is one of those. APOCATASTASIS* is an extraordinary work. In simple, clear language, Lips takes the reader to a deeper understanding of the planets, their dignities and debilities, and on to a "world formula" that brings order to chaos and that will change our world-view. The experienced teacher Heisenberg would only examine the work of his pupils when the result was simple and aesthetically beautiful. The result presented by Lips is simple and beautiful. His astrological research has enabled him to discover the law that thinkers of all cultures have been searching for since time immemorial. The principles of his symmetrical theory are now seen to be inevitable. * not to be confused with the Christian or Stoic meaning of this term, is the astrological teaching of the eternal cycle of the celestial rulers (planets) and their rulership over all things and the zodiac signs.

"In the Path of the Moon" offers a collection of essays concerning Babylonian celestial divination. It investigates various aspects of cuneiform celestial omens, horoscopes, and astronomy and their wide-ranging influences on later Hellenistic science and philosophy.
